Exp 6 – Workflow Automation using Deluge

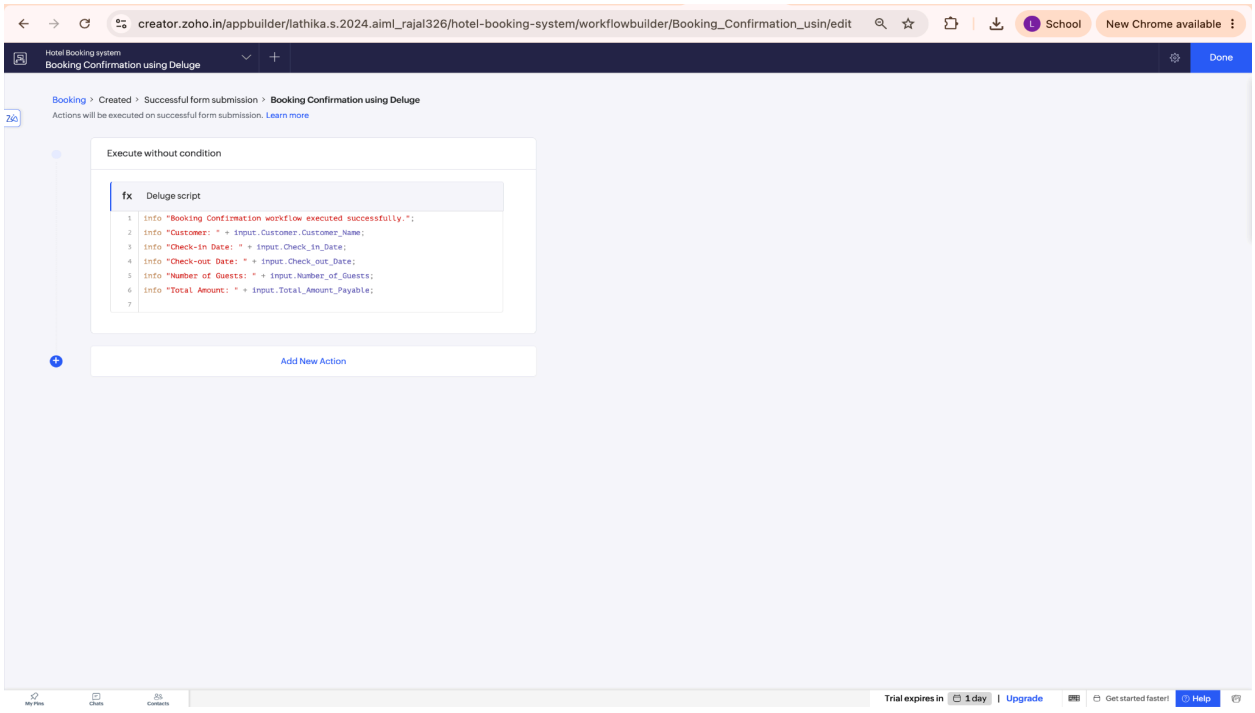

Aim

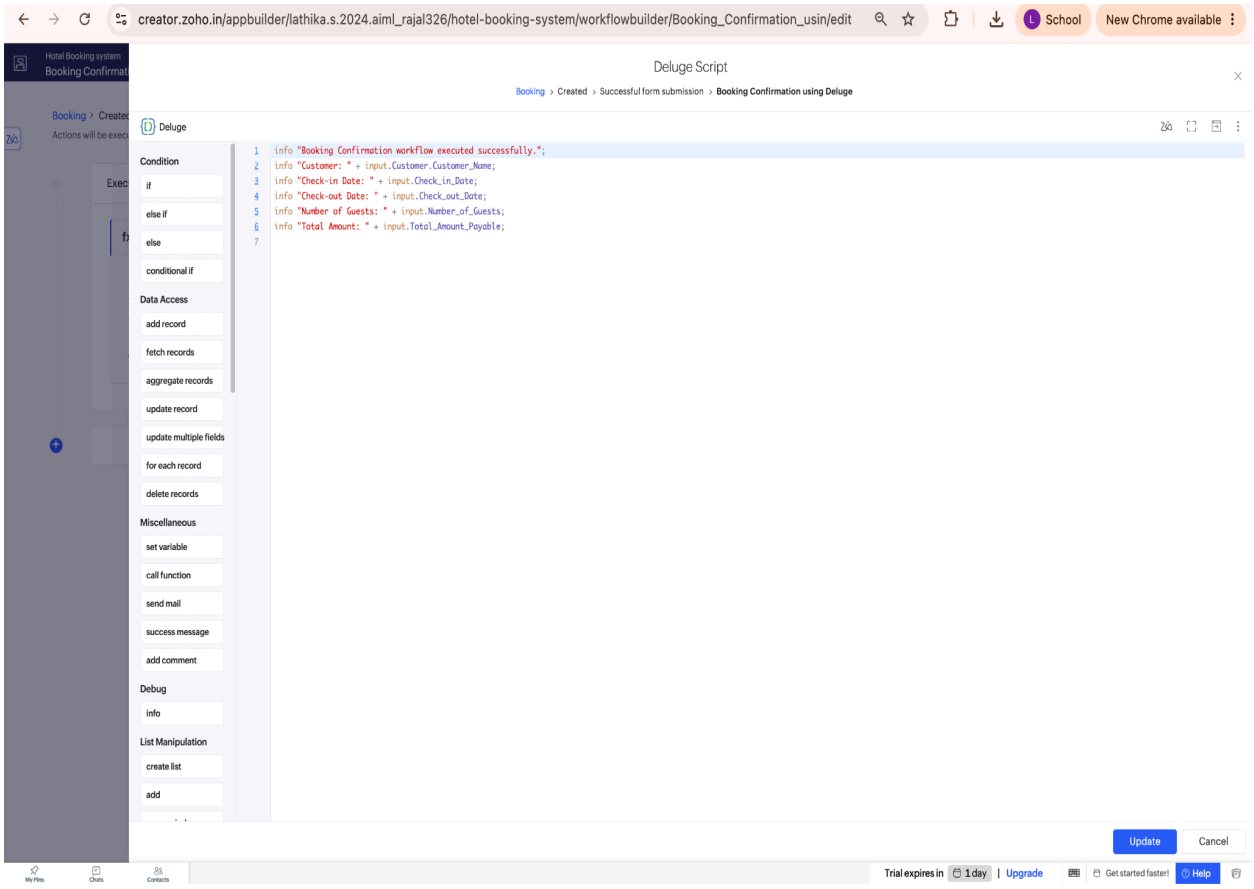

To create and configure a workflow automation using Deluge scripting in Zoho Creator for the Hotel Booking System.

Procedure

1. Open the Hotel Booking System application in Zoho Creator.
2. Open Workflow and select the Booking form.
3. Select the Created record event.
4. Choose Successful form submission as the trigger.
5. Create a workflow named Booking Confirmation using Deluge.
6. Add a Deluge Script action to the workflow.
7. Enter the Deluge script using the booking fields such as customer name, check-in date, check-out date, number of guests, and total amount.
8. Save the Deluge script and enable the workflow.
9. Submit a test booking to trigger the workflow.
10. Verify the workflow and check the application logs for any errors.
